MARCH 12, 2018

Nurse Innovation: Disrupting Healthcare

Target Audience

CNO
CNIO

Nurse Leader
Nurse Educator
Nurse Informatician
Clinical Nurse
and all
Information
Technology
professionals who are
interested in the
impact of technology
on nursing practice.

This activity will be submitted to Boston Children's Hospital for approval to award contact hours. The Boston Children's Hospital is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation. Contact Mary Kennedy at program@nenic.org for more information.

The New England Nursing Informatics Consortium (NENIC) and Boston Children's Hospital are proud to jointly offer this exciting educational opportunity.

NENIC continues to listen to you and bring you programs you have identified as important to your practice!

Nurses, who represent nearly 4 million of the US healthcare workforce, are natural innovators and are constantly innovating at the bedside. Their wealth of knowledge and practical experience, contain the skills to transform healthcare when given the tools to take these processes beyond the bedside to scale.

Rebecca Love MSN, RN, ANP will be identifying nurse leaders who are challenging the status quo using innovation and business principles. She will focus on how these principles can be used to the field of nursing informatics to unleash the future.

Please join us for this exciting evening. **Register today** at nenic.org.

The meeting will be held at Newton Wellesley Hospital (<https://www.nwh.org/patients-and-visitors/planning-your-visit/maps-and-directions>) and a light dinner will be offered for those attending in person.

Program

- 5:30 - 6:00p Dinner /Business Meeting
